To the Trade

OWING to our standard and growth, it has been necessary for us to place before you our 1911 - 1912 catalog. We trust you will find this catalog very serviceable, as we have spent every effort to make it as complete as possible. It has always been our aim to maintain a high standard on our goods and retain the good will of all of our customers.

Our catalog shows a large assortment of material in stock carried in our warehouses, and we are in position to give your wants prompt and courteous attention.

We have many favors for which we wish to thank our old customers, and hope the good will that exists will continue in the future as it has been granted us in the past. We thank you.

OFFICIAL GRADES

SASH, DOORS AND BLINDS

Adopted by the Wholesale Sash, Door and Blind Manufacturers' Association of the Northwest.

DOORS

AAA. Oil Finish Doors—Material for AAA Oil Finish Doors must be Clear, no white sap admitted. Workmanship must be good.

AA.—Oil Finish Doors—Material for AA Oil Finish Doors must be Clear, with the exception that white sap will be admitted, not to exceed twenty-five (25) per cent of the face of any one piece. Workmanship must be good.

No. 1 Quality—Material in No. 1 Doors must be Clear, with the exception that water stains and small pin knots not exceeding one-fourth (¼) inch in diameter may be admitted. No piece to contain more than two (2) such defects and no door more than five (5) such defects on each side; white sap not considered a defect. Workmanship must be good.

No. 2 Quality—Material in No. 2 Doors may contain knots not to exceed one (1) inch in diameter, and blue sap showing on both sides not to exceed fifty (50) per cent in any one piece of the door and gum spots showing on one (1) side of a piece only and other slight defects shall not exceed ten (10) in number on each side and each white pine stile, bottom and lock rail must contain at least one (1) and not to exceed three (3) such defects, plugs admitted and not regarded as a defect. Slight defects in workmanship admitted.

No. 3 Quality—Material in No. 3 Doors may contain all stained sap and small worm holes and fine shake; also knots not exceeding one and three-fourths (1¾) inches in diameter. Twenty (20) defects may be allowed on each side; also slight defects in workmanship. Each piece of white pine in a No. 3 Door must contain a defect. Not more than six (6) defects allowed in any one piece.

No. 4 Quality—No. 4 Doors are regarded as a cull door and must contain large, coarse knots and may contain rot, worm holes, shake and other serious defects.

A Standard Door may be through tennon, blind tennon or dowelled.

WINDOWS

Check Rail Windows may contain two (2) knots three-eighths (⅜) inch in diameter or one red knot five-eighths (⅝) inch in diameter in each piece of a window. White sap and not over thirty-three and one-third (33⅓) per cent blue sap may be admitted in any one window. Workmanship must be good.

Plain Rail Windows and Sash may contain blue sap and small knots.

BLINDS

No. 1 Outside Blinds must be made of Clear lumber except that small sound pin knots, water stain and white sap may be admitted. Workmanship must be good.

WOODS ADMISSIBLE

Woods other than **Michigan, Wisconsin** and **Minnesota** or **Western White Pine** admitted in Doors, Blinds and Windows except in Oil Finish Goods.

THE ADVANTAGES OF OHIO OPENINGS

OHIO OPENINGS of sash, windows and blinds are based on the most simple and rational basis, viz: that all frames which contain the same sizes of glass in width or height should have the same opening, whether there are 2, 4, 8, or 12 lights of glass in the window.

This system is the best for the following reasons:

1st. It simplifies the work of the carpenter in making his frames.

2nd. Should changes from 12 or 8 light to 2 or 4 light windows be desired after frames are set, they can be made and stock sizes used without delay or extra cost.

3rd. It simplifies the work of the dealer in carrying and ordering stock, for instance: one size of frame or blind will answer for 8x12, 12 light, 12x12, 8 light, 12x24, 4 light or 24x24, 2 light windows, and this is true also of many other sizes.

4th. The cost of investment in stock is reduced for the same reason.

5th. There is less liability of error in ordering.

There are many other reasons that might be given in favor of using Ohio Openings, but the above are the most important.

OHIO OPENINGS

2-Light Windows are 4½ inches wider and 6⅛ inches higher than glass size.
4-Light Windows are 4½ inches wider and 6⅛ inches higher than glass size.
12-Light Windows are 4½ inches wider and 6⅛ inches higher than glass size.

WESTERN OPENINGS

2-Light Windows are 4⅛ inches wider and 6 inches higher than glass size.
4-Light Windows are 5 inches wider and 6 inches higher than glass size.
12-Light Windows 1⅛ inches thick are 4 inches wider and 6 inches higher than glass size.
12-Light Windows 1⅜ inches thick are 4½ inches wider and 6 inches higher than glass size.

EASTERN OPENINGS

2-Light Windows are 4 inches wider and 6 inches higher than glass size.
4-Light Windows are 4 inches wider and 6 inches higher than glass size.
12-Light Windows are 4 inches wider and 6 inches higher than glass size.

BUY YOUR WINDOWS GLAZED. WHY?

BECAUSE:

1st. There is less danger of breakage in transit, as the lights are separated one from another, are well protected and the package is handled more carefully than either glass in boxes or open sash.

2nd. Glass in boxes is necessarily packed each light close against the other; thus, if there is any carelessness on the part of the packer many lights are liable to be broken, which is obviated by shipping sash glazed, as each light is separate from the other.

3rd. There is less liability of glazed sash arriving in bad order resulting from dirt in the car, as they are oiled before glazing and are better protected than open sash in making shipment.

4th. The time, annoyance and cost of assembling glass, sash, putty, points, paint, etc., is saved, and in addition to this the goods are ready for delivery on arrival.

5th. We have a large stock of glass to select from, and as a rule can furnish a better average of quality than can be obtained from smaller stocks.

NOTE.—We oil all 2 light windows and transoms and paint all 4 and 12 light windows, and all other sash, unless otherwise directed.

NOTE.—We can furnish cord and weights for all windows at the lowest market prices, thus saving you the trouble and time of weighing sash.

DIRECTIONS FOR ORDERING

Time, Annoyance and Expense can be Saved by Noting and Following Closely the Suggestions Below

We will understand all orders and inquiries as calling for **Regular Ohio Style** and **Sizes** as described in this catalogue, unless specifically ordered otherwise, or unless covered by standing instructions to the contrary.

Be Explicit in ordering. Do not assume that we know what you want.

Always give **width** first, length or height second, then thickness.

Always use inches to designate glass sizes, and feet and inches for openings or outside measurements.

SASH AND WINDOW

The term "Sash" indicates only one piece to fill opening.

The term "Window" indicates two pieces (upper and lower sash).

State size of glass, number of lights, opening (unless regular stock) and thickness. State whether open or glazed, and if glazed whether of single or double strength.

If a window whether check or plain rail.

If segment or circle head give number of style desired (see page 50) and radius of circle or segment if not regular. When not otherwise specified we will understand for Circle Head Style Fig. 1 with a radius one-half the width of the sash less the width of the stiles, and for Segment Head Fig. 3 with a radius tne width of the sash less the width of the stiles.

When an odd sash or window is ordered always give both glass size and number of lights and outside opening, and if possible send sketch.

If glass sizes only are given we will understand that regular stock widths of stiles, rails and bars are required.

Note—All windows and sash are understood to be glazed unless ordered open specifically. All glazed windows are primed or oiled one coat unless otherwise ordered.

DOORS

In the absence of fuller instructions we will consider an order or inquiry for doors to call for the Standard Four Panel O. G. Door No. 1 quality.

State width, height and thickness, number of panels and arrangement of same and quality.

If molded state whether flush or raised mold one or two sides.

State style of sticking unless O. G. is desired.

If oil finish state whether machine smoothed or hand smoothed is desired.

If odd send sketch or detail.

Odd doors will be made with regular stock widths of stiles, rails, muntins and panels unless specifically ordered otherwise.

OUTSIDE BLINDS

State size and number of lights of windows for which blinds are ordered, also thickness of blind, and whether all rolling slats (R. S.), stationary slats (S. S.), or half rolling and half stationary (½ R. S. ½ S. S.).

If odd give outside opening, thickness, arrangement of slats and send sketch.

The regular stock blind has an opening size the width of the window to be covered and 1¾ inch longer.

Blind orders for brick buildings must be so specified, and will in the absence of additional instructions be made two inches longer than window opening.

A blind indicates a single piece to fill opening.

A pair of blinds indicates two pieces to fold together to fill opening.

A set of blinds indicates more than two pieces, and should always be accompanied by sketch.

INSIDE BLINDS

Inside blinds we will understand are to be made four-fold, 1⅛ inch thick, outside panel and inside slats; made to be cut in the center unless otherwise stated.

Give exact outside opening always, thickness, number of folds and arrangement of panels or slats; always send sketch.

If cut twice or more specify height from top to each cut.

If wanted to fold into box, give width of outside folds.

If not the usual arrangement of panels or slats, always send sketch.

For height opening add 6⅛ inches to combined glass sizes.

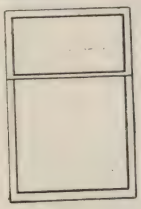
For list on complete window, add together the list for top and bottom sash respectively, either open or glazed.

Irregular and intermediate sizes, six windows or twelve single sash or more of a size and kind, same list as next larger listed size, both open and glazed. For less than six windows, open or glazed of a size and kind, an extra 10 per cent will be charged.

For larger than listed size, see Rule 1, page 64. For sash extras see pages 64, 65, 66.

All check rail windows are plowed and bored unless specified otherwise.

We carry a complete stock of knock down sash, and can assemble immediately any size transom, sash or two light window, 1⅜ inches thick.



TWO LIGHT ORIEL WINDOWS

1⅜ inches Thick.

Check Rail.

For larger than listed size, see Rule 1, page 64. For sash extras see pages 64, 65, 66.

All check rail windows are plowed and bored unless specified otherwise.

We carry a complete stock of knock down sash, and can assemble immediately any size transom, sash or two light window, 1⅜ inches thick.

ONE-HALF CIRCLE TOP WINDOWS

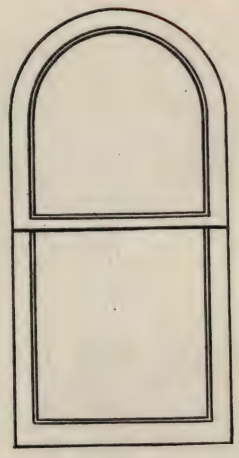

Fig. 1
½ Circle in and out.

Fig. 2
½ Circle out square in.

SEGMENT HEAD WINDOWS

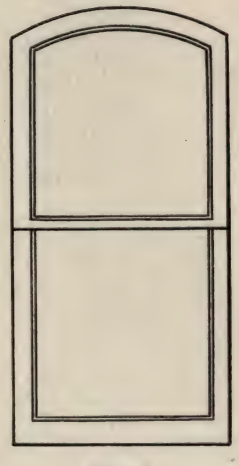

Fig. 3
Segment out and in.

Fig. 4
Segment out square in.

Made to Order only.

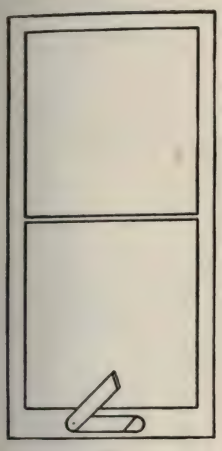
Always give the **radius** of the **segment,** and state whether radius is taken from glass line or outside of rail, otherwise we shall make our regular radius, which is the width of the window opening.

Windows made in the above forms can be filled with any number of lights required.

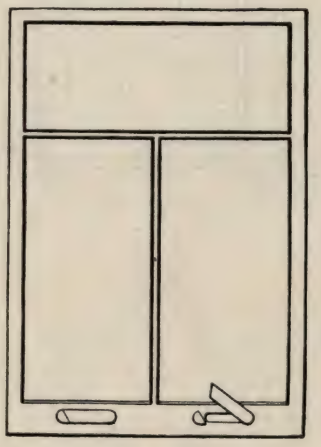
When glazing WE OIL all windows, transoms, and sash unless otherwise directed.

STORM SASH

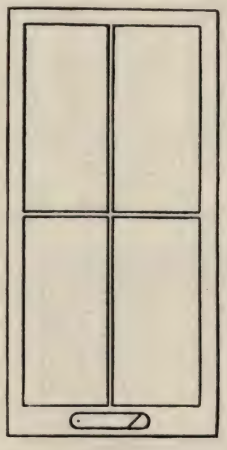
Our make will save ten times their cost in fuel alone.



55
2-Light Storm Sash, with Rail Ventilator, Open.

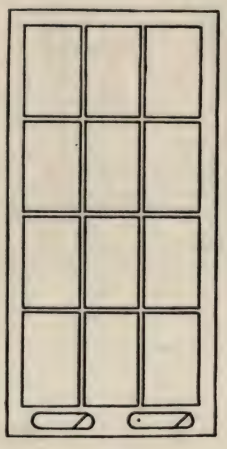


57
3-Light Storm Sash for Cottage Front Windows with Double-Rail Ventilator.



56
4-Light Storm Sash, with Rail Ventilator, Closed.

58
8-Light Storm Sash with Swing-Light Ventilator.



59
12-Light Storm Sash with Double Ventilator, Closed.

LIST PRICES.

When made 1⅛ inches thick, same price as 1⅝-inch Check Rail Windows of same size opening and number of lights.

For 1⅝-inch Open Storm Sash add 15 per cent to Open List of 1⅝-inch Check Rail Window.

For 1⅝-inch Glazed Storm Sash add 20 per cent of 1⅝-inch Open Check Rail Window List to Glazed List. For less than 12 of a size and kind, an extra 10% will be charged.

For Rail Ventilator, either in top or bottom rail, add, if 12 or more, 10c net, less than 12, 12c net.

For Swing-Light Ventilator, add, if 12 or more, 40c net, less than 12, 50c net.

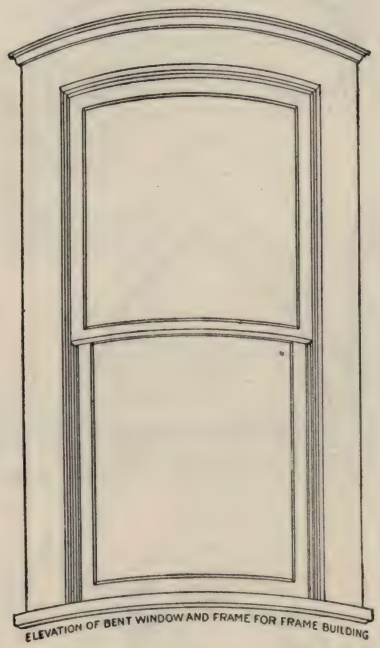
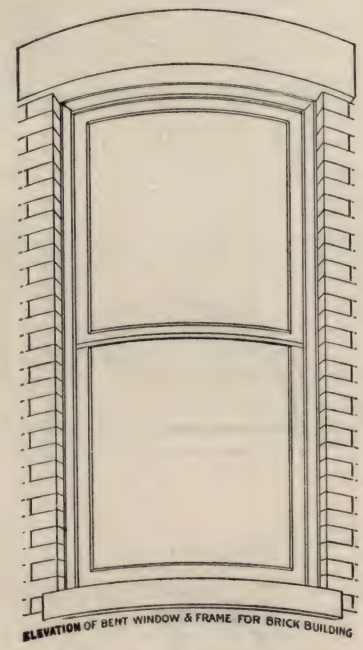
For larger than listed sizes, see Rule 18, plus extras for circle, segment or circle top, according to sash extras on pages 64, 65 and 66.

BENT OR CIRCLE FACE WINDOWS AND FRAMES

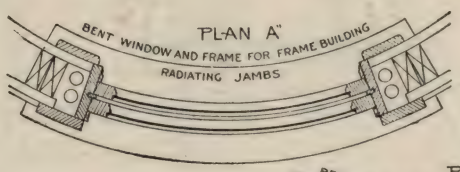
We manufacture bent windows (glazed with window, plate or art glass), at moderate prices. In ordering state which plan is desired and give radius to outside of top sash and exact width straight across between jambs. If jambs are not parallel, a full-sized plan of sill is necessary.

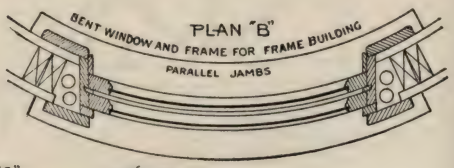


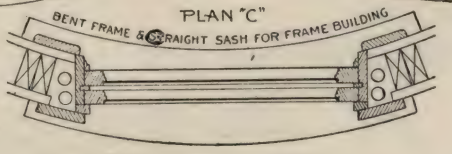
ELEVATION OF BENT WINDOW AND FRAME FOR FRAME BUILDING

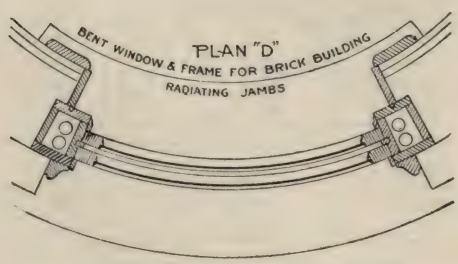


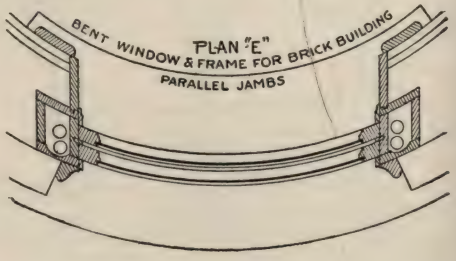
ELEVATION OF BENT WINDOW & FRAME FOR BRICK BUILDING











In ordering Bent Windows always send pattern of bend. If frame jambs are parallel (Plan B) one pattern will do for top and bottom sash; if radial (Plan A), patterns must be sent for both top and bottom sash, as the top sash will be the larger in width.

For prices see sash extras.

153½	6.20	8.68
154½	4.20	5.88
155½	12.00	16.80
156½	8.00	11.20

All designs except Nos. 134, 138 and 144 wider than 28-inch glass will be made with greater number of lights in proportion to the width and charged for according to Rule 11, page 65.

PRICES ON QUEEN ANNE SASH

For prices see Rule 11, page 65.

In making Queen Anne Sash, number of lights will be varied according to size of sash, unless otherwise specified.

LIST ON SEGMENT, CIRCLE AND GOTHIC TRANSOMS

For lists on segment, circle and gothic transoms, open or glazed, of designs as shown on page 53, form list on a one-light square top transom, open or glazed as required, and add as below:

For Design No. **161** or **162** see Sash Extras, Rule 4, page 64.
" " **163** or **164** see Sash Extras, Rule 5, page 64.
" " **165** see Sash Extras, Rule 5, page 64, and add **$2.50** list for 1⅜-inch, **$3.50** list for 1¾-inch.
" " **166** see Sash Extras, Rule 5, page 64, using list for two half circles and Rule 11, notes A and B, page 65.
" " **167** see Sash Extras, Rule 5, page 64, and add **$4.80** list for 1⅜-inch, **$6.70** list for 1¾-inch, for sizes not over 5 feet in width.

If above windows or sash are glazed with white chipped, enameled, or with colored glass (any color except ruby), add to D. S. glazed list formed as above for each square foot of glass measure in the window, 40c list.

If glazed with ruby, add for each square foot, 70c list.

For similar designs with a different number of lights see Rule 11 of Sash Extras, page 65.

SASH EXTRAS

NOTE "A"—When the term "Stock Quantities" is used in these rules, it means 12 or more of the articles of one size, style and quality.

NOTE "B"—For irregular or intermediate sizes in stock quantities, use same list as next larger listed size, both open and glazed.
For less than stock quantities, on sizes not listed, an extra 10% of the open list will be charged.

NOTE "C"—Unless otherwise specified, when a net extra or a list extra is provided, it will apply to either open or glazed list, and when a percentage of the list is provided, it applies to open list only, and should be applied before glazing is added.

LARGER SIZES.

RULE 1.—(a) For list on 1⅛ and 1⅜ inch open windows wider than listed sizes, add to the open list for similar window of widest listed size of same height, for each additional 4 inches or part thereof..... **50c** list

(b) For list on 1⅛ and 1⅜ inch open windows longer than listed sizes, add to the open list for similar window of longest listed size of same width, for each additional 4 inches or part thereof..... **50c** list

WIDE STILES, RAILS OR BARS.

RULE 2.—For list on 1⅜ inch open windows, or sash, with stiles, rails or bars wider than regular stock sizes, add as follows:

(a) For stiles and top rails wider than 2 inches to glass rabbet, for each additional ¼ inch or part thereof, add of the open list to open or glazed list..... **10%** list

(b) For bottom rails wider than 3 inches to glass rabbet, for each additional ½ inch or part thereof, add of the open list to open or glazed list ..... **7½%** list

(c) For check rails thicker than 1⅜ inch and not over 1¾ inches finished sizes, add of open list to open or glazed list..... **20%** list

(d) For vertical bars wider than regular stock, for each additional ¼ inch or part thereof, add of open list to open or glazed list.... **5%** list

(e) For horizontal bars wider than regular stock, for each additional ¼ inch or part thereof, add of open list to open or glazed list.. **5%** list

NOTE.—For rabbeting check rails see Rule 27, page 66.

O. G. LUGS.

RULE 3.—For list on 1⅜ inch open or glazed windows with O. G. lugs, add to open or glazed list for each sash with lugs..... **50c** list

SEGMENT HEADS.

RULE 4.—For list on open or glazed windows or sash with segment or imitation segment heads (Fig. 3 or 4, page 50, add to open or glazed list the following:

	1⅜ inch list.	1¾ inch list.
Up to 2-0⅛ wide (opening).....	**$1.80**	**$2.50**
2-1 to 3-0⅛ " "	**2.40**	**3.35**
3-1 to 4-0⅛ " "	**4.10**	**5.75**
4-1 to 5-0⅛ " "	**5.90**	**8.25**

Over 5-0⅛ wide subject to special price.

HALF CIRCLE OR GOTHIC IN AND OUT.

RULE 5.—For list on open or glazed windows or sash with half circle top (Fig. 1, page 50) or Gothic top (No. 168, page 58) inside and outside, add to open or glazed list the following:

	1⅜ inch list.	1¾ inch list.
Up to 2-0⅛ wide (opening).....	**$4.50**	**$6.30**
2-1 to 3-0⅛ " "	**5.20**	**7.25**
3-1 to 4-0⅛ " "	**7.60**	**10.65**

Over 5-0⅛ wide subject to special price.

HALF CIRCLE OR GOTHIC SQUARE INSIDE.

RULE 6.—For list on open or glazed windows or sash with half circle top outside, square inside (Fig. 2, page 50) or with Gothic top outside, square inside, add to the open or glazed list the following:

	1⅜ inch list.	1¾ inch list.
Up to 2-0⅛ wide (opening).....	**$5.00**	**$7.00**
2-1 to 3-0⅛ " "	**7.00**	**9.80**
3-1 to 4-0⅛ " "	**10.50**	**14.70**
4-1 to 5-0⅛ " "	**13.00**	**18.20**

Over 5-0⅛ wide subject to special price.

FULL CIRCLE SASH.

RULE 7.—(a) For list on open or glazed sash full circle inside and outside, add to open or glazed list of a similar square sash double the amount provided in Rule 5.

(b) For list on open or glazed sash full circle outside, and square inside, add to open or glazed list of a similar square sash double the amount provided in Rule 6.

SASH EXTRAS—Continued

ELLIPTICAL, KITE-SHAPED OR "EYEBROW" SASH.

RULE 8.—For elliptical, kite-shaped or eyebrow sash, add of the open list to the list of a full circle similar size sash (Rule 7), either open or glazed ..... 25% list

PEAK HEAD SASH.

RULE 9.—(a) For list on open or glazed windows or sash with peak head inside and outside (Fig. 171, page 58), add to open or glazed list the following:

	1⅜ inch list.	1¾ inch list.
Up to 2-0⅛ wide (opening)	$2.25	$3.15
2-1 to 3-0⅛ " "	2.80	3.90
3-1 to 4-0⅛ " "	4.00	5.60
4-1 to 5-0⅛ " "	5.50	7.70

Over 5-0⅛ wide subject to special price.

(b) For sash, peak head outside, square inside, add double the amount shown above.

DIAMOND SASH.

RULE 10.—For list on open or glazed sash, diamond shape, add to open or glazed list, double the amount shown by Rule 9.

DIVIDED SASH.

RULE 11.—For list on open or glazed windows or sash divided into small lights, and not specifically listed, add to the list for similar two-light window or one-light sash for each light as follows:

	1⅜ inch list.	1¾ inch list.
(a) For rectangular lights	$0.20	$0.28
(b) For lights not rectangular, but formed by straight bars on all sides (diamond lights) (except suspended lights see Note "C")	.50	.70
(c) For suspended diamond lights (similar to long and square lights in sash Nos. 132, 133, page 57)	.70	.95
(d) For lights not rectangular but formed by curved bars	1.60	2.25

(e) If glazed see Rule 25, Note B, page 66.

COTTAGE STYLE WINDOWS.

RULE 12.—For cottage style windows (with top and bottom light of different heights) not listed, add together one-half of the lists of windows of the same width containing the same or next larger glass size, for the bottom and top respectively, and add ..... 40c list

HALF WINDOWS.

RULE 13.—For half windows (either top or bottom sash) add to half of the list of such window ..... 40c list

1⅛ INCH THICK.

RULE 14.—(a) For list on 1⅛ inch sash, not listed, and for two and four light plain rail windows, use 1⅜ inch list, open or glazed.

(b) For list on 1⅛ inch check rail windows, open or glazed, use 1⅜ inch check rail list.

1⅜ INCH PLAIN RAIL WINDOWS.

RULE 15.—For 1⅜ inch plain rail windows use 1⅜ inch check rail list, open or glazed.

1¾ INCH THICK.

RULE 16.—(a) For 1¾ inch windows or sash, open or glazed, add of the 1⅜ inch open list to the 1⅜ inch open or glazed list, unless otherwise provided for ..... 50% list

(b) For all extras for 1¾ inch windows or sash unless otherwise provided for, add to extras for 1⅜ inch sash ..... 50% list

2¼ INCH THICK.

RULE 17.—For 2 or 2¼ inch windows or sash, open or glazed, add of the 1¾ inch open list to the 1¾ inch open or glazed list ..... 100% list

SINGLE SASH.

RULE 18.—(a) To make open sash list on 1⅜ inch transom, cellar sash and other single sash containing 4 rectangular lights or less, not otherwise provided for in this list, figure the united inches (width and length added) of the entire glass measurement, when 52 united inches or less, per inch ..... 3½c list

(b) For the same, when glass measurement is over 52 and not over 76 united inches, containing 6 rectangular lights or less, per inch 4c list

(c) For the same, when glass measurement is over 76 and not over 100 united inches, containing 8 rectangular lights or less, per inch 4½c list

(d) For the same, when glass measurement is over 100 united inches, containing 12 rectangular lights or less, per inch ..... 5½c list

(e) For greater number of lights than provided for in notes a, b, c and d, add for each extra light ..... 20c list

CASEMENT SASH.

RULE 19.—For casement sash, figure each sash as per Rule 18. If rabbeted, see Rule 27, page 66.

SASH EXTRAS—Continued

WINDOWS WITH MORE THAN TWELVE LIGHTS.

RULE 20.—For 15 lt. windows, open or glazed, add to 12 lt. list..... **30%** list
" 16 " " " " 12 " ..... **37½%** list
" 18 " " " " 12 " ..... **60%** list
" 20 " " " " 12 " ..... **80%** list
" 24 " " " " 12 " ..... **120%** list
NOTE.—When the total glass width exceeds 36 inches, add of the open list, to the open or glazed list..... **10%**

STORE SASH.

RULE 21.—(a) Store sash with stiles and top rail 3 in. to glass line, and bottom rail 4 in. to glass line, 1⅜ in. thick, per lineal foot around the opening ..... **36c** list
(b) Bars for 1⅜ in. sash not over 1 in. between glass, per lineal foot **16c** list
(c) For wider stiles, rails, etc.. see Rule 2, page 64.
(d) For glass beads or stops, see Rule 23.

BENT SASH.

RULE 22.—For square head 1 lt. bent sash, add to 1⅜ or 1¾ in. open list as follows:

RADIUS.	Up to 24⅛ Opening.	25 to 36⅛ Opening.	37 to 48⅛ Opening.	49 to 60 Opening.
Up to 4 ft.	$9.75	$14.50	$20.60	$30.80
4-1 to 5 ft.	8.70	13.00	18.70	28.00
5-1 to 6 ft.	7.90	11.85	17.00	25.40
6-1 to 7 ft.	7.35	11.00	15.40	23.10
7-1 to 8 ft.	7.00	10.50	14.00	21.00

(a) For larger than 8 ft. radius and not over 10 feet, deduct 5% from addition for each 6 inches.
For larger radius than 10 feet, deduct 25%.
(b) For bent windows double the amount for single sash.

STOPS and BEADS.

RULE 23.—For stops or beads around square glass in sash or windows of any thickness, add for each light as follows:

For each light of	List.		List.
16 united inches or less.....	25c	53 to 64 united inches.....	55c
17 to 28 " "	30c	55 to 76 " "	65c
29 to 40 " "	35c	77 to 88 " "	85c
41 to 52 " "	45c	89 to 100 " "	95c

Over 100 united inches add 1c per inch.
NOTE.—The minimum charge under Rule 23 for any sash will be.... **60c** list

OIL FINISH.

RULE 24—For windows or sash selected for oil finish, add of the open list to open or glazed list..... **20%**

GLAZING.

RULE 25.—(a) For glazing with AA glass, add of the 1⅜ inch glazed list..... **10%**
(b) In figuring glass of unlisted glazed sash with marginal or divided lights, either diamond, square, peak or otherwise, figure as though the sash contained but one light of glass and add for glazing, per light..... **5c** list
(c) For windows or sash glazed with white chip, enameled, or with colored glass (any color except ruby), add to D. S. glazed list, for each square foot of glass measure..... **40c** list
If glazed with ruby, add for each square foot, glass measure.... **70c** list

STORM SASH.

RULE 26.—(a) 1⅛ inch storm sash take the same list as given for a 1⅜ inch check rail window with an equal number of lights of the same size.
(b) For 1⅜ inch storm sash, when ordered in stock quantities, add of the 1⅛ inch open storm sash list, to the open or glazed list.. **15%**
For same in less than stock quantities, see Note "B," page 64.
(c) For 3 inch stiles for storm sash, open or glazed, add of the open list **15%**
(d) For O. G. edge on storm sash, add ..... **5c** net
(e) For ventilators for storm sash, add for each ..... **10c** net
(f) For swing lights for storm sash, without hardware, add..... **50c** net
For same, fitted with hooks and hinges, add..... **65c** net
(g) For painting storm sash black one side, add for each sash..... **15c** net

RABBETING.

RULE 27.—(a) For rabbeting outside of rails or stiles of windows or sash, add to the list for each edge rabbeted (except as below)..... **20c** list
(b) For rabbeting check rails of windows, per window..... **40c** list
(c) For rabbeting storm sash, casement or cupboard sash, per pair.. **10c** net
(d) For rabetting sash for plate or other thick glass, add for each sash so rabbeted..... **5c** list
NOTE.—The minimum charge under Rule 27 for any one order will be **15c** net

Where height of door is given where extended stiles are used, height is understood to be from bottom of bottom rail to top of top rail, and not including extension on stiles.

Write for prices stating design, number, thickness and kind of wood.

PINE DOOR EXTRAS

NOTE "A"—When the term "Stock Quantities" is used in these rules it means 10 or more of one size, style and quality.

NOTE "B"—For irregular or intermediate sizes, in stock quantities, use same list as next larger listed size. For less than stock quantities on sizes not listed, an extra 10% will be charged.

LARGER THAN LISTED.

RULE 1—(a) For list on doors wider than listed sizes, use the list of a 3 foot door, same height, and add for each additional 6 inches or part thereof ..... **25% list**

(b) For list on doors longer than listed sizes, use the list of the longest similar door of same width, and add for each additional 6 inches or part thereof ..... **15% list**

(c) For single doors made to represent a pair, add..... **$2.50 list**

THICK DOORS.

RULE 2—(a) For 1¾ inch doors, not otherwise provided for, add of the 1⅜ inch four panel door list for same size ..... **50% list**

(b) For list on 2 or 2¼ inch doors (single or double thick) form list for a simlar 1¾ inch door and add ..... **50% list**

(c) For list on 2½ inch door (single or double thick) form list for a similar 1¾ inch door and add..... **70% list**

(d) For list extras on doors thicker than 1⅜ inches, where extras are specified as applying to 1⅜ inch doors, add for the different thicknesses same percentage as above.

WIDE STILES, RAILS OR MUNTS.

RULE 3—(a) For 1⅜ inch doors with stiles and top rails wider than 4¾ inches (including solid mold)add for each additional 1 inch or part thereof **75c list**

(b) For 1⅜ inch doors with cross rails (other than top, lock or bottom rails,) wider than 4¾ inches (including solid mold), add for each wide rail for each additional one inch or part thereof..... **15c list**

(c) For 1⅜ inch doors with lock or bottom rails wider than 8⅝ or 9¾ inches respectively (including solid mold), add for each wide rail for each additional 1 inch or part thereof ..... **25c list**

(d) Sliding doors having one stile wider than regular, add per door two-thirds price in Note "A."

PANELS.

RULE 4—(a) Arrangement of panels.

Doors No. 200 and 201, over 3- 0 and not wider than 4-0, 3 panels wide.
Doors No. 200 and 201, over 4- 0 and not wider than 4-10, 3 or 4 panels wide.
Doors No. 200 and 201, over 4-10 and not wider than 6- 0, 4 or 5 panels wide.
Doors No. 200 and 201, over 6-0 and not wider than 7- 0, 5 or 6 panels wide.
Cross panel doors up to and including 7-4, 5 panels high.
Cross panel doors 7-6 and not higher than 8-6, 6 or 7 panels high.
Cross panel doors 8-8 and not higher than 10-0, 7 or 8 panels high.
For a less number of panels (making wider panels), special price will be charged.

ADDITIONAL PANELS.

NOTE "B"—For more panels than provided for in the lists, add for each additional panel ..... **30c list**

CROSS PANELS.

NOTE "C"—For doors having two or more cross panels not covered or otherwise provided for, add to their respective list for crossing panels ..... **30c list**

GRADUATED PANELS.

NOTE "D"—For graduated panels, add for each panel..... **30c list**

MOULDED PANELS.

RULE 5—Doors with moulded panels, add to list of similar 1⅜ or 1¾-inch O. G. doors as follows:

Flush moulded 1 side, per panel ..... **40c list**
Flush moulded 2 sides, per panel ..... **65c list**
Raised mould 1 side, per panel ..... **80c list**
Raised mould 2 sides, per panel ..... **$1.30 list**

DIFFERENT STYLES OF DOORS.

RULE 6—(a) (One Panel) For one panel doors, special price.
(b) (Two Panel) For two panel doors, 1 wide, 2 high, special price.
(c) (Two Panel) For two panel doors, 2 wide, 1 high, use 4 panel list and add ..... **15% list**
(d) (Three Panel) For three panel doors, special price.
(e) For four cross panel doors, special price.

PINE DOOR EXTRAS—Continued

SASH DOORS.

RULE 7—(a) For sash doors not listed add to the list of a similar panel door of the same size:
If 1 light No. 4 quality, **20c list**—No. 1 and 2 quality **25c list.**
If 2 light No. 4 quality, **40c list**—No. 1 and 2 quality **50c list.**
If 4 light No. 4 quality, **40c list**—No. 1 and 2 quality **50c list.**
(b) For sash doors with marginal or divided lights, add to list of a similar 1 lt. door for each light, the same amount as provided in Rule 11, sash extras.
(c) For list on solid mould doors, 3 feet wide or less, segment head or segment corner glass, add to list for a similar 1-light door with square glass ..... **$1.50 list**

OUR "Korelock" door factory produces over seventy-five per cent of all the stock veneered doors manufactured in the world.

Our "Korelock" stock hardwood doors are an established standard. They are absolutely guaranteed against defects in the manufacture.

Any "Korelock" doors proving defective due to faults in the manufacture will be replaced immediately with a new door in the white, and freight charges paid.

A Perfect Core

THE KORELOCK DOOR

SECTION OF STILE

THE primary purpose of veneering is to overcome the tendency of all wood to swell, buckle or warp.

In the "Korelock" Doors, the cores are built up of strips as shown in cut to the left. The tendency of one piece to buckle or warp is neutralized by similar tendencies of other pieces.

The parts constituting the core are united by glued dove-tailed joints.

The veneers are welded to the core by water-proof glue under a hydraulic pressure of over 1,000 lbs. to the square inch.

The Core is the foundation of the Door. A Perfect core is the guarantee of a Good Door.

Sizes not listed above, special prices.

FINISHING WOODWORK

PROPER FINISH IS NEXT IN IMPORTANCE TO GOOD WOODWORK

The beauty of finished wood lies in the retaining of the natural figure in a clear, uniform shade. It matters not how expensive the woodwork may be, it can be spoiled in the finishing. The labor cost in applying poor material is just as great as good material. The market at present is flooded with cheap and indifferent finishing materials. The result of their use is lack of character, a faded and muggy effect.

In obtaining materials, it is advisable to purchase only from reliable supply houses, and wherever possible secure the goods in sealed cans, bearing the label of an established manufacturer. Any of the large varnish and stain manufacturers will furnish promptly on request samples and reliable information on stains, fillers and varnishes, which will insure uniformity in shade and retain the natural figure and character of the wood.

While the use of the proper materials is very important in order to secure a good finish, the results also depend on the care exercised by the workmen.

The process of finishing woodwork can be understood more clearly by considering the subject under the following heads: Woods, Temperature, Surfaces, Stains, Filling and Finishing Coats.

WOODS. The woods used for Interior woodwork are divided into two classes, viz., Close Grained Woods, which do not require paste filler, and Open Grained Woods, which do require paste filler. The following is a classified list:

Close Grained Woods

HARDWOODS

Birch	Circassian Walnut
Cherry	Gum
Maple	

SOFTWOODS

White Pine	Washington Fir
Yellow Pine	Whitewood
Oregon Pine	Poplar
Tamarack	California Redwood
Basswood	Cedar
Spruce	Hemlock

Open Grained Woods

Ash	Butternut
Oak	Chestnut
Walnut	Calico Ash
Mahogany	Brown Ash
Prima Vera (White Mahogany)	

TEMPERATURE. To apply varnish satisfactorily, the temperature of the room in which it is used should be heated to about 70 degrees Fahrenheit, as cold interferes with the working qualities of varnish. It is very important that the wood be free from dampness or the varnish will not dry satisfactorily. Weather conditions

also affect the drying. It requires considerably longer time for varnish to dry in warm, sultry weather.

SURFACES. Varnish does not conceal but magnifies the natural beauty of the wood. A defect on the surface will also be magnified; hence, the importance of seeing that the surface is carefully smoothed and free from defects, dirt and dust before applying any varnish.

STAINS. Stains of reliable quality, of nearly any shade desired, may be purchased in proper shape for applying. Where stain is used, it is the first application on the wood, either open or close grained, after it is properly surfaced and cleaned.

Stains are designated according to the liquid vehicle in which the colors are mixed, as Spirit Stains, Oil Stains and Water Stains.

Spirit stains usually have alcohol as a vehicle. This evaporates so quickly and the stain dries so rapidly that it is impossible to apply the stain evenly on a surface of any dimension. The wood becomes dark in some places and light in others, and the "laps" show plainly. Any attempts at equalizing usually make matters worse. Spirit stains also have a tendency to "bleed," i. e., their color works through the varnish finish.

Oil Stains are intended principally for soft or close grained woods. They do not raise the grain and for this reason are economical in producing the smooth finishes. Splendid effects can be obtained with oil stains, but the colors are less clear and transparent than those produced by water stains.

Water Stains, often termed acid stains, produce the most satisfactory results. They have a tendency to raise the grain, but this is easily overcome by sponging wood with clear water and sanding smooth before applying the stain. This is only necessary where very smooth finishes are desired. Water stains produce clear, transparent colors, are simple to use, can be applied evenly and quickly on woods of all kinds and will permit of any method of finishing over them.

FILLING. Close Grained Woods do not require paste filler, as they have no open cellular tissue to fill. Open Grained Woods, after being properly surfaced and stained, where a stain finish is desired, should be thoroughly filled with what is known as "paste filler." The filler should be allowed at least twenty-four hours to dry and the surface carefuly sandpapered. If an examination shows that the surface is perfectly smooth, the wood may be considered ready for the first coat of varnish. When filling stained woods, the shade of filler is usually the same color as the stain, but frequently altered to produce varied effects.

FINISHING COATS. Up to this point the process of finishing is the same, whether interior or exterior woodwork. At this point it is necessary to use a finishing varnish suitable for the purpose. On Exterior Woodwork a high grade of Exterior Varnish should be used to stand the exposure of the weather. Two good coats will prove satisfactory, but three will give the finish more fullness and a richer effect. On Interior Woodwork an Interior Finishing Varnish should be used, the exact kind and quality depending on whether the final finish is to be left in the gloss, rubbed dull or rubbed and polished.

Gloss Finish. On interior woodwork apply to the natural or stained surface a thin coat of shellac, let dry and then sand with OO flint paper. Apply first coat of interior gloss varnish. Allow to dry thoroughly, then sand with OOO flint paper. Apply second coat of same varnish and let dry. On Exterior Woodwork DO NOT USE SHELLAC. A good grade of exterior varnish should be used and applied directly

to the surface. Sand first coat of varnish when dry with OOO flint paper, then apply second coat of exterior varnish and let dry. If third coat of varnish is applied, sand with 000 sand paper between second and third coats.

Rubbed Finish. On interior woodwork use an interior rubbing varnish. Proceed the same as for gloss finish, rubbing the last coat when dry with FFF pumice stone and paraffine rubbing oil to an egg-shell gloss. Wipe surface clean with cotton waste. On exterior woodwork use a good grade of exterior varnish, same as for Gloss Finish, proceed in the same way, rubbing the last coat when thoroughly dry with FFF pumice stone and paraffine rubbing oil to an egg-shell gloss. Wipe the surface clean with cotton waste.

Rubbed and Polished Finish. On interior woodwork use a rubbing and polishing varnish. Proceed the same as for a rubbed finish. After rubbing finish coat of varnish with pumice stone and oil, polish with rotten stone and furniture polish. Wipe surface clean with cotton waste. It is not customary to rub and polish exterior woodwork.

Flat Finishes. There are at the present time on the market various Flat Finishes for interior woodwork of reliable quality, which will produce either a Mission or Rubbed Finish without the labor of rubbing. While these materials do not entirely take the place of rubbing and polishing varnish, there are many cases where they may be used with the highest satisfaction, and by their use either of the above named effects will be secured at a greatly reduced cost. Where material of this nature is used, the finishing process is the same up to the application of the finishing coat.

The woods of the native forests best adapted for interior woodwork are Birch ("American Mahogany"), Oak and Ash. These woods are finished in various shades. The most popular at present are:

FOR BIRCH:

Natural	Golden
Cherry	Weathered
Light Mahogany	Flemish Brown
Medium Mahogany	Flemish Green
Dark Mahogany	Old English

FOR OAK:

Natural	Brown
Antique	Mission Green
Weathered in various shades	Golden

FOR CALICO ASH AND BROWN ASH, the popular shades are the same as for Oak.

ADDITIONAL INFORMATION AND SAMPLES. On request we will gladly furnish our customers with additional detailed information on finishing and suggestions as to the proper kinds of material to use, also finished samples of wood. In writing for this data, kindly state—

(a) The kind of wood on which the finish is to be applied,

(b) The color, shade and nature of the finish desired on the woodwork.

COLONNADE FINISH

Instructions to Give When Ordering

To avoid delay and possible misunderstanding, accompany each order with the following information:

A.—Give kind of wood wanted.

B.—Give width and height of rough opening.

C.—Give thickness of walls from face to face of plaster.

D.—Give diameter of shaft of column desired.

E.—Give detail or catalogue number of base in room.

F.—Give width and height of pedestals.

G.—If trim is to be included give design or number.

H.—Specify width of casing.

I.—If jambs or casings are required your order must so state.

J.—In every case give height of base and base moulding. Unless designs are given, we will stilt the pedestals and ship without base and base moulding.

We will furnish upon request, estimates of any style of Colonnade Finish or Cased Openings illustrated in any book or according to architects' plans.

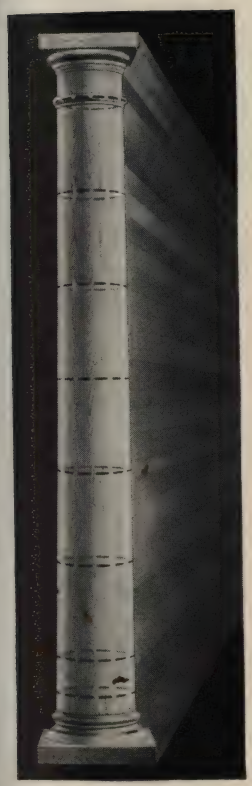
COLONIAL COLUMNS



Dowel-Lock
(X-Rayed)
Black Dashes Indicate Location of the Reinforced Dowel-Lock Joint, the Crowning Feature of the Column.

WE RECOMMEND OUR
DOWEL-LOCK COLUMN
FOR FIRST-CLASS WORK

In its construction we use twelve staves of Louisiana Red Cypress, insuring an extra strong, straight shaft. Every eight-foot column has ninety-six reinforced joints which practically eliminate the natural expansion and contraction of the wood.

DOWEL-LOCK,
CYPRESS STAVE,

PROCESS OF CONSTRUCTION

First—The edges of the staves are coated with **Weather Proof** glue.
Second—Round wood dowels also coated with **Weather Proof** glue are inserted.
Third—After the above operations are completed, the shaft is pressed into a compact mass, and after remaining in the press 24 hours, so as to allow the glue to become thoroughly set, the column is then ready for the turning lathe, where it is hand turned and ready for shipment.

For prices see pages 267, 268 and 269.

Openings for sash are the same as the listed window openings in this catalog.
Above prices are for frames (Knock Down), pulleys and screws loose.
Add to list 70c for putting up frames.
List above without cambers.
If cambers are wanted for box pulley frames for brick walls, must specify if one or two each are required, giving spring and thickness.
Add to list 20c each for cambers ⅞ in. thick.
Add to list 30c each for cambers 1⅛ in. thick.
All brick wall frames for 13 in. walls or wider are rabbeted for sub-jamb.
Always specify thickness of wall.
Deduct from list 20c for window frames for frame building (stud walls), if with 1⅜ in. pulley stiles. Same applies to pulley frames for brick veneer walls.
All pulley stiles on brick wall frames are 1⅜ in. or 1⅛ in., at our option.

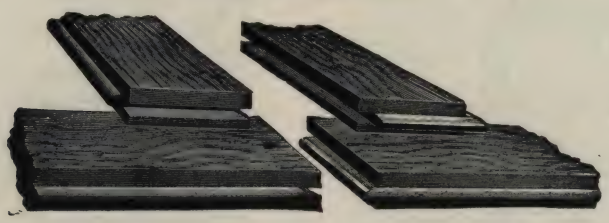
HARDWOOD FLOORING

Plain and Quarter Sawed Oak (Red or White), Rock Maple and Birch.

Dressed and Matched.



Regular Thickness is 3/8 and 7/8 inches. Length 2 to 16 feet.

The Standard Widths of Our Flooring Are as Follows:

The 2 1/4 in. rough is worked 2 in. face
The 3 in. rough is worked 2 1/4 in. face
The 4 in. rough is worked 3 1/4 in. face

Weights of Flooring.

3/8 in. Flooring weights 1000 pounds per 1000 ft.
7/8 in. and thicker weighs 2500 pounds per 1000 ft.

Three-quarters of an inch allowed for all matching in flooring 1/2 in. and thicker.

Hardwood floors are healthful, handsome and economical. With modern appliances, are easily kept clean and the natural beauty of the wood retained. Are cheaper than carpets, and when used in connection with rugs, give a very handsome effect in the furnishing of the modern home.

This 3/8-inch dressed and matched flooring takes the place of the old-fashioned thick flooring; is cheaper in price, easier laid and wears for all time. With ordinary care given hardwood flooring, you do not even wear through the finishing of the floor, let alone wearing out the floor. Consequently 3/8-inch flooring is supplanting thick floors and is laid on linings to form new floors in new houses.

But, the special features of the 3/8-inch flooring is its adaptability in covering old floors, doing away with the soft floor and carpets, and giving a strictly "hygienic" floor, attractive, beautiful, lasting and finished in the natural wood.

Our flooring is run with a polished surface, tongued and grooved, matched ends and holes bored for blind nailing, so that the question of laying and finishing a hardwood floor is now reduced to a minimum, as it is end matched, any lengths however short, can be utilized and the floor laid as substantially as though in one piece.

Maple flooring has no rival for durability and is used in office buildings, schools, public halls, churches, dwellings, stores, etc. Oak flooring, while adapted to all the uses of Maple, is used largely in living rooms, sleeping apartments of the modern house, and is a wood of so much beauty and utility and so well known as to require but little description. We furnish the Oak flooring in plain and quarter-sawed.

Birch flooring is largely used in buildings where the woodwork is Birch. It makes an excellent floor, adds to the harmony and decorative effects. For these reasons is specially adapted for residences.

The finishing of hardwood floors is simple and the amount of attention required to keep the floor in perfect order is less than sweeping old fashioned carpets. On request we will furnish our customers information on how to properly finish Hardwood Floors.

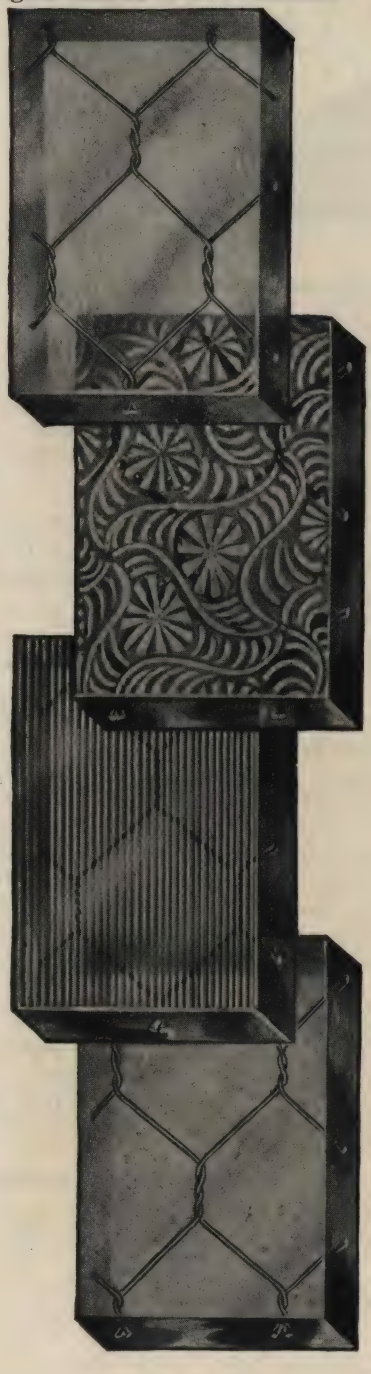
Lights Instead of Fire Shutters.



WIRE GLASS

Recommended by the Boards of Fire Underwriters of All Principal Cities in the United States as a Perfect Fire Retardant.

Some Advantages of "Wire Glass" Windows

They offer a positive resistance to spread of fire.
Shutters must be opened for lighting, closed for protection.
Windows are shut nine times where shutters are closed once.
Closed shutters hinder the watchman from detecting an interior fire.
"Wire Glass" windows aid the watchman; the blaze will reveal the fire.
Closed shutters are an obstacle to the fire department.
"Wire Glass" windows can readily be broken through by the axes in the hands of the firemen.
"Wire Glass" windows admit light, giving access to the building at all times without the labor of opening shutters.
"Wire Glass" in approved metallic frames or sashes will reduce rate of insurance in many cases 10% or more.

FULL SIZE DETAILS OF "WIRE GLASS"

SHOWN IN ILLUSTRATIONS

POLISHED A product equal in strength with respect to the fire and break hazards, to the better known Ribbed, Holly and Rough or Hammered "Wire Glass," and possessing at the same time complete transparency and adaptable for all purposes where "Wire Glass" is demanded together with an unobstructed vision.

HOLLY Is the ideal surface for high-class mercantile structures, office buildings, hotels, apartment houses, colleges and schools, and all places where greatest distribution of daylight is desired, together with exclusion of vision.

RIBBED Adapted to skylight service in factories, warehouses, piers, power plants, etc. It is patterned in accordance with Edward Atkinson's specifications for maximum diffusion of light.

ROUGH A semi-transparent fire-retardant glass for use where complete vision or decorative effect is not particularly essential. Used in skylights, windows and doors of all classes of buildings, and most extensively employed in factories, mills, warehouses, train-shelds and power buildings.
